

ABDUL RAHMAN

Rahim Yar Khan, Punjab | [Email](#) | [LinkedIn](#) | [Github](#) | [Portfolio](#)

SKILLS

Programming Languages

- Python, JavaScript, TypeScript, C#, Dart, PHP, Go

Frameworks & Libraries

- Frontend: React, Flutter, Electron, React Native
- Backend: Django & DRF, Nest.js, [Node.js](#), Go

Cloud Platforms & Services

- AWS (EC2, S3, Route 53, Lambda, SES, CloudFront, CodePipeline, CodeBuild), Firebase, Supabase, Heroku, Appwrite

DevOps & CI/CD

- CI/CD: GitHub Actions, Jenkins, CodeMagic
- Deployment & Orchestration: Vercel, GitHub Pages, Heroku, AWS CodeBuild, Netlify, aaPanel, cPanel, Northflank, Keyob, Render, Railway

Version Control

- Git, GitHub, BitBucket

WORK EXPERIENCE

Taloo (Part Time, Remote)

AI & Full Stack Developer

Australia

Nov 2025 - Present

- Building AI powered applications and automation workflows using modern frameworks and tools.

HH Tech Hub (Full Time, On Site)

Full Stack App & Web Developer, Team Lead, Floor Manager

Islamabad, Pakistan

June 2025 - September 2025

- Leading development of two POS apps for bridal/groom dress orders and raw material tracking using **Flutter** and **Django**.
- Built responsive UIs with **Next.js** and integrated real-time features via **Supabase**.
- Overseeing the company's website from design to deployment, ensuring modern, mobile-first experience.
- Supervising interns, assigning tasks, and guiding development practices.
- Collaborating with global teams using **GitHub**, **Trello**, and **Slack**.

Trektoo (Part Time, Remote Job)

Cairo, Egypt

Full Stack Web Developer

April 2025 - Present

- Built the frontend with **Next.js (React)** for hotel reservations and guided tour bookings.
- Integrated APIs to handle **dynamic hotel listings, tour packages, availability calendars, and booking transactions.**
- Collaborated remotely with a global team using **GitHub, Trello, and Slack.**

Domesta (Remote)

Bahrain

Full Stack Web Developer

March 2025 - July 2025

- Developed a multi-role **maid hiring and workforce management platform.**
- Built the frontend in **Next.js**, connected with APIs for user management, job matching, verification workflows, bookings, and notifications.
Ensured responsive UI/UX and integrated **real-time notifications, form validation, and admin-level controls.**

Devloop Technologies (Remote)

Rahim Yar Khan

Full Stack Web Developer

January 2025 - October 2025

- Leading development on **6+ full-stack projects** as Project Head
- Built projects using **Next.js (React)** for frontend and **Python (Django) & Laravel (PHP)** for backend services.
- Implemented clean architecture, responsive design, and performance optimizations.
- Managed team collaboration through GitHub, with workflows for version control and code reviews.
- Focused on building scalable, maintainable, and user-friendly solutions across multiple platforms.

Freelance Developer (Self-Employed)

Remote

Full Stack Mobile & Web Developer

December 2021 - February 2025

- Delivered **25+ custom applications** for clients across various industries, including 9 **Flutter** mobile applications, 4 **Django** web projects, 4 **React + Vite** frontend applications, 8 **Nextjs, Vue** full projects.
- Developed Flutter mobile apps with clean architecture and state management best practices, including one machine learning-powered application.
- Built Django-based web applications with RESTful APIs, database design, and authentication systems.
- Created modern, high-performance web applications using React + Vite, delivering fast build times and optimized user experiences.
- Implemented responsive designs, optimized performance, and ensured cross-platform compatibility for mobile and web applications.
- Managed project timelines, client communications, and delivered solutions meeting client requirements and deadlines.

Builtin Soft (On Site, Full Time Job)

Rahim Yar Khan

Application Development in Flutter

July 2021 - October 2021

- Led development of **7+ Flutter mobile apps** as Project Head.
- Applied **clean code principles** and **state management best practices** for scalable architecture.
- Handled debugging, optimization, and deployment across **Android** and **iOS** platforms.
- Used **GitHub** for code management, CI/CD, and collaborative development.

LEADERSHIP & INVOLVEMENT

Project Head & Developer, Devloop Technologies

Rahim Yar Khan

Led the development of 4 full stack web projects, managed GitHub workflows and delivered scalable solutions with clean architecture.

Project Head & Developer, Builtin Soft

Rahim Yar Khan

Led the development of 7 Flutter based applications, managed GitHub version control and collaborated with a cross-functional team.

Team Lead & Developer - Pintech Expo 2025

Expo Center, Lahore

Represented university at a national level tech expo. Presented AgroSmart with live demos, focusing on its use of AI in farming and online agri-shopping features.

Team Lead, Developer & Project Head - University's FYP (AgroSmart)

KFUEIT, Rahim Yar Khan

Headed and managed a team of 2 in developing a smart agriculture solution using Django and deep learning. Oversaw all modules, including crop disease detection, fertilizer recommendations, and an integrated agro marketplace.

Team Lead & Developer - Chamber of Commerce & Industry Exhibition 2025

Rahim Yar Khan

Showcased AgroSmart to local businesses and farmers. Highlighted its practical benefits in farming, including disease detection and smart buying of fertilizer and spray.

Team Lead & Developer - KFUEIT Innovation Challenge 2025

KFUEIT, Rahim Yar Khan

Participated in the university's innovation competition. Presented AgroSmart and explained how it can help farmers through AI-based crop advice and smart tools.

RECENT PROJECTS

AI Business Publisher: Business Profile Optimization Platform

Web platform built with **React**, **Express**, and **PostgreSQL** for AI assistant visibility management. Implements Google Places API integration, multi-stage website scraping with Playwright, GPT-4o content enhancement, schema.org JSON-LD structured data publishing, EEAT crawlability scoring, and Stripe pay-per-profile payments.

Automated Social Media Platform

Web platform built with **NestJS**, **Next.js**, and **PostgreSQL** for dealership social media management. Implements OAuth integration with Google/Facebook Business, automated review syndication, branded template engine, Bull Queue scheduling, and multi-franchise analytics dashboard.

Battery Electrode Wrinkle Detection System

Industrial quality control system developed using **Python**, **CustomTkinter**, **OpenCV**, and **scikit-image** for battery electrode manufacturing. Performs real-time defect detection using laser sensors and computer vision with multi-algorithm wrinkle detection and OPC-UA industrial integration to optimize production quality control.

Maqbool Fashion & Fabrics (ERP, Point of Sale)

Developed using **Django**, **Flutter**, and **PostgreSQL**, Maqbool Fashion is a point-of-sale, accounting, and personal management software for customizing bridal and groom dresses on demand. It features tailored order management, POS billing, financial tracking, customer records, and workflow tools to streamline dress customization and business operations.

Domesta: Maid Hiring & Workforce Management System

Developed using [Next.js](#), Domesta is a multi-role platform for hiring maids, and managing employees, employers, agencies, and superadmins. It features job matching, multi-dashboard access, verification workflows, booking systems, and admin oversight tools for workforce coordination.

Trektoo: Travel Agency Platform with Hotel, Tour & Vehicle Booking

Built with [Next.js](#), this platform enables users to book hotels and guided tours with real-time availability. Features include search filters, tour and hotel listings, booking flows, payment integration, and multi-language support.

AgroSmart: Fertilizer, Spray Advisor & Marketplace

Built with **Django**, **Python**, and **Deep Learning**, this smart agriculture platform identifies crops and diseases, recommends fertilizers and sprays, and supports a marketplace for agro-products.

TuneFinder

Built with **Flutter**, **Riverpod**, **Dart** and **Arccloud**, a responsive music recognition application using services like arc cloud.

POP & ROLL: Beverages

Built with **THREE.js**, **GSAP**, **Blender**, and **CorelDRAW**, this project presents beverages through immersive 3D visuals, smooth animations, and creative brand storytelling.
